The School District of Hartford Jt #1 Community Survey - Draft 5th FINAL / 12 November 2008

Hello. Is this (ASK FOR THE NAME ON THE LIST)? I'm calling for The Hartford Joint One School District from the Center for Community Opinion. We have been asked to call residents of the District, people like you, to ask for your reaction to a number of School District plans and ideas. This survey will only take about 12 minutes and your answers to the questions are very important. All of your answers will be strictly confidential.

1. Let's begin. Which of the following statements about the local public schools is true in your community. (ROTATE)

- 1 There is one public school district serving students from kindergarten through 12th grade in Hartford; or
- 2 There are two public school districts serving local students. One serves students in kindergarten through 8th grade and the other serves the community's high school students.
- 3 DK
- 4 REFUSED

[READ TO THOSE RESPONDING 1 OR 3 TO Q1] Before we proceed, I want to tell you a little bit about the local public schools. Hartford is a rather unique community. It is served by two different public school districts. Hartford Joint One serves students from kindergarten through 8th grade. The Hartford Union High School District serves only high school students. Throughout this survey, I will be asking you questions about Hartford Joint One, the district that operates the local public elementary and middle schools. Let's proceed.

2. Students are often given the grades of A, B, C, D, and F to denote the quality of their work. The School District of Hartford Joint One operates the elementary and middle schools that serve your community. Suppose the school district was graded in the same way students are graded. What grade would you give to the quality of the education students receive at Hartford Joint One?

- 1 A
- 2 B
- 3 C
- 4 D
- 5 F
- 6 DON'T KNOW
- 7 REFUSED (TERMINATE)

Community Survey - Draft 5th FINAL / 12 November 2008**

23. If the district builds additional classroom space, it must also raise the funds to operate those classrooms. Although the state will provide the district with the funds needed to hire teachers for those classrooms, the district must raise the funds needed both to increase the ability of the cafeteria to feed additional students and to clean and maintain the new classrooms. Therefore, the school district will also ask local voters to approve a second proposal to raise the local funds needed to operate those new classrooms. Would you favor or oppose such a proposal?
